DISTILLING

We start with first-press light cane juice molasses. After fermentation, we distill the rum in our traditional Hoga still and finish with a run through our 4-plate column still to bring out the balanced, rich rum flavors. Following distillation, we filter it through 100-micron pad filters and proof it down to 40% ABV.

TASTING NOTES

This light rum features the clean, bright aromas of a classic rum. On the nose, you will find hints of almond, vanilla, Asian pear, and subtle floral aromas. Initial sips reveal a silky mouthfeel with fresh pear notes, vanilla, and green coriander. This rum is light on the palate with a clean finish.
